

Quick-guide Software installation L-3866/67 USB

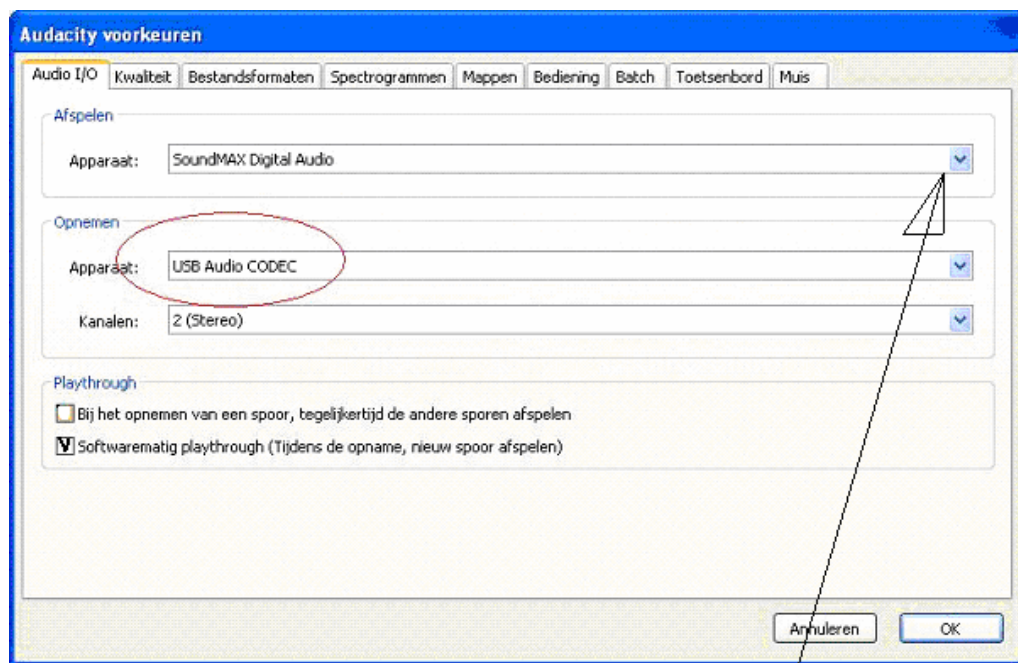

- Connect the turntable to the USB port of the PC (do not connect the red and white connectors to the PC)
- Install the Audacity software on the PC (follow the on-screen instructions)

remark: when using Vista Professional, install the software as administrator

- Launch the Audacity software.
- In Audacity, select "Edit" in the menu bar, then select "preferences".
- In Audio I/O, select "USB audio Codec" in the pull-down menu (recording device)

remark: if the turntable is connected to the USB port after launching the software, the "USB audio Codec" will not be available in the pull-down menu.

- Highlight the second option under "Playthrough".

Playback of the recorded track can't be heard: select the soundcard in the pulldown menu. Depending on the PC's configuration, the soundcard can be different from the one shown on the image,.

- As a test we recommend you to execute the following steps.
- Play a record, in Audacity press the record button, a new "Track" will appear automatically. During recording you'll see the Level meters blink.
- Stop the recording where you want with the stop button
- Press the play button to check the recorded part.
- For a more detailed description of how to use the software and turntable please refer to the manual.
- Check <http://audacity.sourceforge.net/> for more information about Audacity.
