

Noise Cancelling Headphone

Users` manual HP- 080

HP-080 Noise Cancelling Headphone adopt special electrical circuit to reduce the surrounding noise, which can improve hearing effect. Even if in noisy environment you may enjoy high quality stereo music.

1.Features

- ① This item is suitable for any audio devices.
- ② Own stereo headphone and stereo noise cancelling headphone function.
(Switch on the noise cancelling function when you are in noisy environment)

2.Parts Introduction

3.User's Manual

- ① Mount 2 x AAA batteries in the battery case.
- ② Turn on the power switch, the power indicator will be on. Connect the audio device with the headphone, adjust the volume properly, you will sense that noise outside is decreased a lot.

- ③ When you turn off the headphone, you can use it as a normal stereo wired headphone.

4. Parameter

- ① Working Volt: DC 3V (2xAAA batteries)
- ② Working Current:<55mA (0.7 sine wave loading volt)
- ③ Noise Reduction: >16dB at F=300Hz
- ④ Sensitivity: 114dB \pm 2 dB at F=1KHz
- ⑤ Frequency Response:20Hz~20KHz

5.Working condition

- ① Working temperature: -10°C~60°C, working humidity:20%~90%
- ② When use this item, try to avoid overloading signal input, operate it in the range of the power input extension.

6.Problem and Solution

Problem	Causes	Solutions
Noise cancelling function doesn't work	Doesn't mount battery or reverse the polarities, battery run out of ,or the power is lower	Replace the old battery with new one ,meanwhile mount the battery according to the engraved polarities .

Caution: When not use them, please turn off the headphone. And pop the batteries if you won't use them for a long time. Try to avoid touching this item with sharp object in order not to influence the appearance.
